Coderhouse (2021)

Recognition from the institution for being in the top 10 of the course.

About me

I am a Fullstack Developer with 2 years of experience and constantly growing.

My main skill is Backend with Typescript. I want to work with a company, which allows me to take a leap in my professional and personal knowledge.

Work experience

Fullstack Developer

Fullstack Projects:

Memex

I created a self-manageable social network. The images of the posts are uploaded to firebase. Authentication can be done with google or you can also register in the platform. Perform all the backend and frontend functionalities.

Technologies used: NodeJS, Typescript, ReactJS, Redux, Firebase, PostgreSQL, JWT

4Devs

I generated a REST API for a self-managing social network in React Native with authentication. Realize the frontend and all the backend functionalities.

Technologies used: Node.js, React Native, Redux, MySQL, JWT.

E-commerce app

I made a self-manageable ecommerce. With authentication and a dashboard for the administrator. With order generation and confirmation.

Technologies used: NodeJS, NestJS, MongoDB, ReactJS.

Note app

I made a self-manageable notes app. The notes are stored in a database.

Technologies used: NodeJS, Typescript, ReactJS, MongoDB.

Cybersecurity technical assistant

EDSI Trend Argentina (5/22 - 7/22)

Offers specialized technical assistance in Trend Micro products. Providing Content Security and Data Protection solutions.
